ASSIGNMENT – V

C language: Arrays and Strings

5.1 Write a C program to print the elements of an array in reverse order.
5.2 Write a program in C to copy the elements of one array into another array.
5.3 Write a C program to find the largest and smallest elements of an array.
5.4 Write a C program to swap the elements of two arrays.
5.5 Write a C program to find the average of the elements of an integer array. Also find the standard deviation of these elements.
5.6 Write a C program to sort a set of n numbers in descending order and then search for a given number (taken from user) in the set of sorted numbers.
5.7 Write a C program to insert an element (given by the user) into an array in a particular position (given by the user).
5.8 Write a C program to delete an element from a particular position (given by the user) in an array.
5.9 Write a C program for shifting an element of an array one location left.
5.10 Write a C program to print Fibonacci series using array.
5.11 Write a program in C to print a 3x3 matrix using 2D array.
5.12 Write a program in C for addition of two Matrices of same size.
5.13 Write a program in C for multiplication of two square Matrices.
5.14 Write a C program to find length of a string without using strlen() function.
5.15 Write a C program to concatenate two strings without using strcat() function.
5.16 Write a C program to reverse a strings without using strrev() function.
